

Contents

Introduction	i
Who is this series for?	i-1
How to use this book	i-2
Things to know before reading this book	i-2
Abbreviations	i-3
Definitions	i-5
Tables	i-6
What you will need to use this book	i-6
Installing the source code on your computer	i-7
What is on the disc	i-8
Prerequisite to using this book	i-8
What is not discussed in this book	i-9
Final word before we get started	i-9
Part 1	
Chapter 1. Overview of the USB.....	1
The process from connection to disconnection	1-2
How the PC communicates with the USB.....	1-2
How the USB communicates with the device	1-3
The difference in USB speeds	1-3
Other things to know and consider	1-4
The design goal of this book	1-4
Tested devices	1-6
Chapter 2. The PCI Hardware	2
Now that we have this information, what to do with it.....	2-4
Port I/O verses memory mapped I/O.....	2-7
Determine the address space required for a function	2-8
Other fields in the PCI address space	2-9
Offset 0x60 for UHCI and EHCI controllers	2-10
EHCI and companion controller function numbers.....	2-10
The PCI and Power Management.....	2-11
Chapter 3. The UHCI Hardware	3
UHCI host controller detection	3-5
Set up the UHCI controller	3-7
The UHCI port status/control register	3-8
Resetting the port	3-9
Enabling the port	3-10
Detecting multiple ports on a root hub.....	3-11
Miscellaneous UHCI notes.....	3-12

Chapter 4. The UHCI Stack	4
The UHCI Stack	4-1
Transfer descriptors	4-2
Queues	4-6
The FYSOS stack frame	4-9
How the UHCI handles the stack	4-13
Summary.....	4-14
Chapter 5. The OHCI Hardware	5
The OHCI Controller's root hub.....	5-11
The OHCI Controller's port register	5-14
OHCI Host Controller detection	5-17
Set up the OHCI controller	5-19
Properly Setting the OHCI Controllers Operational Registers	5-20
The OHCI port status/control register	5-22
Powering the port	5-22
Resetting the port	5-23
Enabling the port	5-24
Summary.....	5-24
Chapter 6. The OHCI Stack	6
The OHCI Stack	6-1
Endpoint Descriptors	6-2
Transfer Descriptors	6-8
Summary.....	6-11
Chapter 7. The EHCI Hardware.....	7
Explanation of companion controllers.....	7-1
Host Controller Capability Registers	7-3
Host Controller Operational Registers.....	7-7
Explanation of the PORTSC register.....	7-16
EHCI host controller detection	7-18
Set up the EHCI controller	7-20
The EHCI port status/control register	7-22
Resetting and enabling the port	7-23
Detecting multiple ports on a root hub.....	7-24
Chapter 8. The EHCI Stack	8
The EHCI Stack.....	8-1
Transfer Descriptors	8-2
Queue Heads	8-8
Controller Schedule	8-11
The FYSOS Periodic Stack Frame.....	8-11
The FYSOS Asynchronous Stack Frame	8-15

How the EHCI Handles the Stack	8-16
--------------------------------------	------

Chapter 9. The xHCI Hardware 9

Host Controller Capability Registers	9-1
Host Controller Extended Capabilities List	9-8
xHCI USB Legacy Support	9-9
xHCI USB Supported Protocol Capability	9-11
Port Routing and Control	9-13
Host Controller Operational Registers	9-14
Explanation of the Save/Restore Operation	9-20
Example of the Memory Mapped I/O Space	9-21
The Root Hub's Port Status and Control Registers	9-22
Explanation of the PORTSC Register	9-22
Explanation of the PORTPMSC Register	9-26
Explanation of the PORTLI Register	9-28
Explanation of the PORTLPMC Register	9-29
Explanation of the Host Runtime Register Set	9-29
Explanation of the Doorbell Register Set	9-34
Detecting and Resetting the Host Controller	9-36
Set up the xHCI controller	9-38
The xHCI Port Status/Control Register Set	9-39
Paring up the USB 2.0 and USB 3.0 Port Resisters	9-40
Resetting and Enabling the Port	9-42
Detecting Multiple Ports On a Root Hub	9-45

Chapter 10. The xHCI Stack 10

Memory Usage and Alignment	10-1
The xHCI Device Context Area	10-2
The xHCI Device Context Data Structure	10-5
The xHCI Endpoint Context Data Structure	10-11
The xHCI Transfer Descriptor	10-15
The xHCI Transfer Request Block	10-15
The xHCI Control Transfer Request Block	10-17
The Setup Stage Transfer Request Block	10-18
The Data Stage Transfer Request Block	10-20
The Status Stage Transfer Request Block	10-22
The Command Completion Transfer Request Block	10-23
The xHCI Transfer Rings	10-24
The Command Ring and TD Transfer Ring	10-27
The Command's Event Ring	10-29
Segment Tables	10-30
Starting the Communication Process	10-31

Part 2

Chapter 11. Device Enumeration with the UHCI Stack Frame	11
Creating a Queue of Transfer Descriptors	11-2
Getting the Device Descriptor of the Device	11-3
Inserting your queue into the stack	11-7
Setting the Address of the device.....	11-8
Getting the String Descriptor(s) of the Device	11-9
Getting/Setting the Configuration of the Device	11-11
Short Packet Detection with the UHCI Stack.....	11-13
Chapter 12. Device Enumeration with the OHCI Stack Frame	12
Creating Endpoint Descriptors and Transfer Descriptors	12-2
Getting the Device Descriptor of the Device.....	12-3
Inserting your transfer descriptors into the stack	12-7
When Controller Has Processed the Endpoint Descriptor.....	12-10
Setting the Address of the device.....	12-14
Getting the String Descriptor(s) of the Device	12-15
Getting/Setting the Configuration of the Device.....	12-17
Chapter 13. Device Enumeration with the EHCI Stack Frame	13
Driver Initialization and the BIOS	13-1
Creating Queue Heads and Transfer Descriptors	13-2
Getting the Device Descriptor of the Device.....	13-4
Inserting a Queue into the Stack	13-9
Removing a Queue from the Stack	13-10
Controller Has Processed the Transfer Descriptors.....	13-11
Setting the Address of the device.....	13-14
Getting the String Descriptor(s) of the Device	13-15
Getting/Setting the Configuration of the Device.....	13-16
Chapter 14. Device Enumeration with the xHCI	14
The New Cables and Backward Compatibility	14-1
Is it a USB 2.0 Port or a USB 3.0 Port.....	14-4
Driver Initialization	14-8
Sending Commands to the Controller	14-9
Detecting a Connection on the Root Hub	14-11
Enabling a Slot for the Found Device	14-12
Setting the Address of a Device.....	14-14
Getting the Status of a Transfer	14-17
Getting the Device Descriptor of the Device.....	14-18
Getting the String Descriptor(s) of the Device	14-22
Configuring an Attached Device.....	14-23
Short Packet Detection	14-24

Part 3

Chapter 15. Using the USB Mouse.....	15
The HID Mouse Device Descriptors	15-1
Configure the HID Mouse	15-7
The HID Report	15-9
Retrieving mouse movement	15-11
Chapter 16. Using the USB Keyboard	16
The HID Keyboard Device Descriptors	16-1
Configure the HID Keyboard.....	16-8
The HID Report	16-10
Retrieving Keyboard Key Press Data	16-12
Setting the Keyboards LED's	16-13
Other Comments	16-14
Chapter 17. Using the USB Mass Storage Device	17
The MSD Drive's Device Descriptors	17-2
Configure the MSD Drive.....	17-10
USB Mass Storage Device LUN's	17-10
Introduction to the Bulk-Only Protocol	17-11
Sending Commands Using the CBW/CSW interface	17-14
Command Definition	17-16
Inquiry.....	17-17
Read Format Capacities.....	17-19
Request Sense.....	17-23
Read Capacity(10)/ Read Capacity(12)	17-26
Read(10)/Read(12)/Read(16)	17-29
Write(10)/Write(12)/Write(16).....	17-32
Reset	17-32
Other Commands and Comments.....	17-32
Chapter 18. Using the USB Floppy Storage Device	18
The Floppy Drive's Device Descriptors	18-2
Configure the Floppy Drive	18-8
Introduction to the Floppy Protocol	18-9
Sending Commands Using the CBI interface	18-11
UFI Command Definition	18-13
Inquiry.....	18-13
Read Format Capacities.....	18-15
Request Sense.....	18-19
Read(10)/Read(12).....	18-21
Write(10)Write(12).....	18-22
Send Diagnostic/Reset	18-22
Other Commands and Comments.....	18-23

Chapter 19. Using the USB External Hub	19
An Introduction to External Hubs.....	19-1
The Hub's Device Descriptors	19-2
Configure the External Hub.....	19-6
Detecting Number of Downstream Ports	19-8
Resetting and Enabling the Hub	19-11
Powering, Resetting, and Enabling a Port on the Hub	19-11
USB 2.0 Hubs and Transaction Translators	19-17
Other Comments	19-19
Chapter 20. Using a USB Printer Device	20
The Printer's Descriptors	20-2
The Three Available Protocols	20-10
Configure the Printer	20-12
Get IEEE 1284 Device ID String	20-14
Printing Text Using the PCL Language	20-16
Other Comments	20-18
Chapter 21. Using a USB HUB on the xHCI Root Hub.....	21
The Hub's Device Descriptors.....	21-2
The BOS Descriptor	21-5
The Configuration Descriptor	21-8
The Super Speed Endpoint Companion	21-11
Configuring the External Hub and a Catch-22	21-12
Set Depth Request	21-12
Detecting the Number of Downstream Ports	21-15
Configuring the External Hub Again	21-15
Resetting and Enabling the Hub	21-16
Other Comments	21-16
Chapter 22. Using a USB 3.0 Mass Storage Device.....	22
The MSD's Drives Device Descriptor	22-1
The String Descriptors.....	22-2
The BOS Descriptor	22-4
The Configuration Descriptor	22-8
Configure the MSD Drive.....	22-11
Other Comments	22-12

Part 4

Chapter 23. Using a USB Protocol Analyzer	23
The Beagle from TotalPhase	23-1
Setting up the hardware	23-1
Receiving bus traffic	23-2
Reading and Understanding the Report	23-3
Chapter 24. The Human Interface Device	24
A Brief Introduction to Human Interface Devices	24-1
The HID descriptor	24-2
How to parse the HID descriptor	24-3
The Included HID Parser Code	24-5
Other Comments	24-9

Part 5

Chapter 25. Using a USB Video Camera	25
The Camera's Device Descriptors	25-1
Interface Association and Function Descriptors	25-6
The Video Control Interface	25-8
The Video Streaming Interface	25-13
The Color Matching Descriptor	25-19
Alternate Interface Descriptors	25-20
A Known Video Device	25-22
A Little More Information	25-22
Configure the Camera for Video	25-24
Other Commands and Comments	25-24
Chapter 26. Setting Up the USB Video Camera	26
Choosing/Setting the Camera's Resolution	26-1
Resolution Negotiation	26-3
Choosing the Alternate Interface	26-5
Receiving Payload Data	26-6
Stream Buffer	26-7
Comments	26-8
Chapter 27. The EHCI and ISO Transfers	27
The EHCI Stack	27-1
ISO Transfer Descriptors	27-1
Creating an ISO Transfer	27-3
Wrap up	27-5

Appendix A - Disc Contents	A
Contents of the disc/disc layout	A-1
Installing the Source Code on your Computer	A-2
Finding the Specification Files	A-3
Appendix B - Included Utilities/Source Code	B
Obtaining a C/C++ Compiler	B-1
Obtaining an Assembler	B-1
PKSFX(R) FAST! Self Extract Utility Version 2.50	B-2
DetCntlr -- Detect Controllers Version 1.00.00	B-3
GDevDecs -- Get Device Descriptor Version 1.00.00	B-4
HIDParser -- Parse a given HID Report Descriptor Version 1.00.00	B-6
MputImage -- Write a disk image to a floppy disk	B-7
Appendix C - Tables and Figures	C
Appendix D - Notes for all Controller Types/Devices	D
Port Connection Status Change.....	D-1
ISO Transfers.....	D-1
Controller Quirks	D-2
The BOS Descriptor	D-5
Device Address Number.....	D-5
String Descriptors with an Index of 0xEE	D-5
The Configuration Descriptor's Bus Powered Bit.....	D-5
Appendix E - Request Sense Return Data	E
Appendix F - Brief History of USB	F
Specification/Hardware Release History	F-2
Brad Hosler - Founder of USB	F-3
Appendix G	G
xHCI TRB Types and Completion Codes	G-1
Setup Packet.....	G-4
bmRequestType	G-4
bRequest.....	G-5
Descriptor Types	G-6
Appendix H - USB OTG (On The Go)	H
Appendix I - USB Class Codes	I
Appendix J - Device Firmware Upgrade	J

Appendix K - New Type C USB Connector	K
Appendix Q - Building a Simple USB Device	Q
Our Attiny2313 Breakout Board	Q-3
Soldering the Components	Q-5
The Programmer	Q-6
The Cross Compiler	Q-6
Fusing and Flashing	Q-8
Build Blink Device	Q-10
Troubleshooting	Q-11
Building an Actual USB Device	Q-12
Build Output Device	Q-13
Build Input Device	Q-18
Conclusion	Q-22
Other Comments	Q-23
Appendix X - For More Information	X
Where to get the CDROM that is included with this book	X-1
Where to find more information on this book	X-1
Where to get an erratum if one is needed	X-1
Where to get more examples	X-1
Bibliography	Bib
