

# Contents

<b>Introduction .....</b>	<b>i</b>
The series as a whole .....	i-1
Who is this series for? .....	i-1
How to use this book .....	i-2
Things to know before reading this book .....	i-2
Abbreviations .....	i-3
Definitions .....	i-6
Tables .....	i-6
What you will need to use this book .....	i-6
Installing the source code on your computer .....	i-7
What is in the repository? .....	i-8
Prerequisite to using this book .....	i-8
What is not discussed in this book .....	i-9
Final word before we get started .....	i-9

## Part 1

<b>Chapter 1. Overview of the USB.....</b>	<b>1</b>
The process from connection to disconnection .....	1-2
How the PC communicates with the USB .....	1-2
How the USB communicates with the device .....	1-3
The difference in USB speeds .....	1-3
Other things to know and consider .....	1-4
The design goal of this book .....	1-4
Tested devices .....	1-6
<b>Chapter 2. The PCI Hardware .....</b>	<b>2</b>
Access to the Configuration Space .....	2-2
Legacy PCI access .....	2-2
The new PCIe access .....	2-8
Finding a device .....	2-10
Now that we have this information, what to do with it .....	2-11
Port I/O verses memory mapped I/O .....	2-14
Determine the address space required for a function .....	2-15
Other fields in the PCI address space .....	2-16
Offset 0x60 for UHCI, EHCI, and xHCI controllers .....	2-17
EHCI and companion controller function numbers .....	2-17
The PCI and Power Management .....	2-18
Function 0, Header Type Field, Bit 7 .....	2-20
Wrap Up .....	2-21

<b>Chapter 3. The UHCI Hardware .....</b>	<b>3</b>
UHCI host controller detection .....	3-5
Set up the UHCI controller .....	3-7
The UHCI port status/control register .....	3-8
Resetting the port.....	3-10
Enabling the port .....	3-10
Detecting multiple ports on a root hub .....	3-12
Miscellaneous UHCI notes.....	3-13
Resetting UHCI controllers.....	3-14
 <b>Chapter 4. The UHCI Stack .....</b>	 <b>4</b>
The UHCI Stack .....	4-1
Transfer Descriptors .....	4-2
Queues.....	4-7
The FYSOS stack frame .....	4-10
How the UHCI handles the schedule .....	4-15
Lost Queues.....	4-22
Explanation of the Transfer Descriptor's C_ERR and Status Fields .....	4-23
Wrap Up .....	4-25
 <b>Chapter 5. The OHCI Hardware .....</b>	 <b>5</b>
The OHCI Controller's root hub .....	5-11
The OHCI Controller's port register .....	5-15
OHCI Host Controller detection .....	5-17
Set up the OHCI controller .....	5-20
Properly Setting the OHCI Controllers Operational Registers .....	5-20
The OHCI port status/control register .....	5-22
Powering the port .....	5-23
Resetting the port.....	5-23
Enabling the port .....	5-25
Wrap up.....	5-25
 <b>Chapter 6. The OHCI Stack .....</b>	 <b>6</b>
The OHCI Stack .....	6-1
Endpoint Descriptors.....	6-2
Transfer Descriptors.....	6-7
Short Packets and the Toggle bit.....	6-11
Summary .....	6-13
 <b>Chapter 7. The EHCI Hardware .....</b>	 <b>7</b>
Explanation of companion controllers .....	7-1
Host Controller Capability Registers .....	7-3
Host Controller Operational Registers .....	7-9
Explanation of the PORTSC register .....	7-18

EHCI host controller detection .....	7-20
Set up the EHCI controller .....	7-22
The EHCI port status/control register .....	7-24
Resetting and enabling the port .....	7-24
Detecting multiple ports on a root hub .....	7-26
EHCI and Rate-Matching Hubs.....	7-26
EHCI and Built-in Transaction Translators.....	7-27

## **Chapter 8. The EHCI Stack .....8**

The EHCI Stack .....	8-1
Transfer Descriptors.....	8-3
Queue Heads .....	8-8
Controller Schedule.....	8-11
The FYSOS Periodic Stack Frame .....	8-11
The FYSOS Asynchronous Stack Frame .....	8-17
How the EHCI Handles the Stack .....	8-17

## **Chapter 9. The xHCI Hardware .....9**

Host Controller Capability Registers .....	9-1
xHCI USB Supported Protocol Capability .....	9-9
Port Routing and Control.....	9-10
Host Controller Operational Registers .....	9-12
Explanation of the Save/Restore Operation.....	9-18
Example of the Memory Mapped I/O Space .....	9-19
The Root Hub's Port Status and Control Registers .....	9-20
Explanation of the PORTSC Register.....	9-21
Explanation of the PORTPMSC Register .....	9-25
Explanation of the PORTLI Register.....	9-27
Explanation of the PORTLPMC Register .....	9-27
Explanation of the Host Runtime Register Set.....	9-28
Explanation of the Doorbell Register Set .....	9-33
Detecting and Resetting the Host Controller.....	9-35
Set up the xHCI controller .....	9-37
The xHCI Port Status/Control Register Set.....	9-38
Paring up the USB 2.0 and USB 3.0 Port Resistors .....	9-39
Resetting and Enabling the Port .....	9-41
Resetting both Protocol Register sets.....	9-44
Detecting Multiple Ports On a Root Hub .....	9-44

## **Chapter 10. The xHCI Stack .....10**

Memory Usage and Alignment.....	10-1
The xHCI Device Context Area .....	10-2
The xHCI Device Context Structure .....	10-4
The xHCI Endpoint Context Structure.....	10-10

The xHCI Transfer Descriptor .....	10-14
The xHCI Transfer Request Block .....	10-15
The xHCI Control Transfer Descriptor .....	10-17
The Setup Stage Transfer Request Block .....	10-17
The Data Stage Transfer Request Block .....	10-19
The Status Stage Transfer Request Block.....	10-22
The Command Transfer Request Block.....	10-23
The Command Completion Transfer Request Block .....	10-24
The Link Transfer Request Block.....	10-25
Transfer Events .....	10-27
Transfer Event TRB .....	10-28
The xHCI Transfer Rings .....	10-29
The Command Ring and Transfer Ring .....	10-31
The Event Ring .....	10-34
Segment Tables .....	10-35
Streams .....	10-36
The Stream ID format.....	10-41
Starting the Communication Process.....	10-42
Wrap up.....	10-42

## Part 2

### Chapter 11. Device Enumeration with the UHCI Stack Frame ..... 11

Creating a Queue of Transfer Descriptors .....	11-2
Getting the Device Descriptor of the Device .....	11-3
Inserting your Queue into the Stack.....	11-7
Setting the Address of the Device.....	11-8
Getting the String Descriptor(s) of the Device .....	11-8
Getting/Setting the Configuration of the Device.....	11-10
Short Packet Detection with the UHCI Stack .....	11-13

### Chapter 12. Device Enumeration with the OHCI Stack Frame ..... 12

Creating Endpoint Descriptors and Transfer Descriptors .....	12-2
Getting the Device Descriptor of the Device .....	12-3
Inserting your Transfer Descriptors into the Stack .....	12-6
When Controller Has Processed the Endpoint Descriptor .....	12-9
Setting the Address of the device .....	12-12
Getting the String Descriptor(s) of the Device .....	12-13
Getting/Setting the Configuration of the Device.....	12-15

### Chapter 13. Device Enumeration with the EHCI Stack Frame ..... 13

Driver Initialization and the BIOS .....	13-1
Creating Queue Heads and Transfer Descriptors .....	13-2
Getting the Device Descriptor of the Device .....	13-4

Inserting a Queue into the Stack .....	13-8
Removing a Queue from the Stack.....	13-9
Controller Has Processed the Transfer Descriptors .....	13-10
Setting the Address of the device .....	13-12
Getting the String Descriptor(s) of the Device .....	13-12
Getting/Setting the Configuration of the Device.....	13-14

## **Chapter 14. Device Enumeration with the xHCI ..... 14**

The New Cables and Backward Compatibility .....	14-1
Is it a USB 2.0 Port or a USB 3.0 Port .....	14-4
Driver Initialization.....	14-8
Sending Commands to the Controller.....	14-10
Detecting a Connection on the Root Hub .....	14-12
Enabling a Slot for the Found Device .....	14-13
Using an Input Context.....	14-14
Setting the Address of a Device.....	14-17
Getting the Status of a Transfer.....	14-20
Getting the Device Descriptor of the Device .....	14-20
Getting the String Descriptor(s) of the Device .....	14-24
Configuring an Attached Device .....	14-25
Short Packet Detection .....	14-28

## **Part 3**

## **Chapter 15. Using the USB Mouse..... 15**

The HID Mouse Device Descriptors .....	15-1
Configure the HID Mouse.....	15-7
The HID Report .....	15-9
Retrieving Mouse Movement .....	15-11
Other Comments.....	15-13

## **Chapter 16. Using the USB Keyboard ..... 16**

The HID Keyboard Device Descriptors .....	16-1
Configure the HID Keyboard.....	16-8
The HID Report .....	16-10
Retrieving Keyboard Key Press Data .....	16-12
The Phantom Report.....	16-15
Repeat with Delay and the LEDs .....	16-16
Setting the Keyboards LED's .....	16-16
Other Comments.....	16-18

## **Chapter 17. Using the USB Mass Storage Device ..... 17**

Introduction to MSD Devices.....	17-1
The MSD Drive's Device Descriptors.....	17-2

Configure the MSD Drive .....	17-11
USB Mass Storage Device LUN's.....	17-11
Introduction to the Bulk-Only Protocol .....	17-13
Sending Commands Using the CBW/CSW interface .....	17-15
Command Definition.....	17-18
Inquiry .....	17-18
Read Format Capacities .....	17-21
Request Sense .....	17-24
Read Capacity(10)/ Read Capacity(12).....	17-27
Read(10)/Read(12)/Read(16).....	17-31
Write(10)/Write(12)/Write(16) .....	17-33
Report LUNs .....	17-33
Reset.....	17-36
Other Commands and Comments .....	17-37

## **Chapter 18. Using the USB Floppy Storage Device ..... 18**

The Floppy Drive's Device Descriptors .....	18-2
Configure the Floppy Drive .....	18-8
Introduction to the Floppy Protocol .....	18-9
Sending Commands Using the CBI interface .....	18-12
UFI Command Definition.....	18-14
Inquiry .....	18-14
Read Format Capacities .....	18-16
It Didn't Work.....	18-19
Request Sense .....	18-20
Mode Sense .....	18-22
Read(10)/Read(12) .....	18-25
Write(10)Write(12) .....	18-26
Test Unit Ready .....	18-27
Send Diagnostic/Reset .....	18-28
Other Commands and Comments .....	18-28

## **Chapter 19. Using the USB External Hub ..... 19**

An Introduction to External Hubs .....	19-1
The Hub's Device Descriptors .....	19-2
Configure the External Hub.....	19-6
Detecting Number of Downstream Ports .....	19-8
Resetting and Enabling the Hub .....	19-11
Powering, Resetting, and Enabling a Port on the Hub .....	19-11
USB 2.0 Hubs and Transaction Translators .....	19-17
Maximum Hub and Tier.....	19-19
Other Comments.....	19-20

**Chapter 20. Using a USB Printer Device .....20**

The Printer's Descriptors .....	20-2
The Three Available Protocols .....	20-10
Configure the Printer .....	20-12
Get IEEE 1284 Device ID String .....	20-14
Printing Text Using the PCL Language .....	20-16
Other Comments .....	20-18

**Chapter 21. Using a USB HUB on the xHCI Root Hub.....21**

The Hub's Device Descriptors .....	21-2
The BOS Descriptor .....	21-5
The Configuration Descriptor .....	21-8
The Super Speed Endpoint Companion .....	21-11
Configuring the External Hub and a Catch-22 .....	21-12
Set Depth Request .....	21-12
Detecting the Number of Downstream Ports .....	21-15
Configuring the External Hub Again .....	21-15
Resetting and Enabling the Hub .....	21-16
Powering, Resetting, and Enabling a Port on the USB 3.0 Hub .....	21-16
Retrieving the Port Status .....	21-16
Other Comments .....	21-19

**Chapter 22. Using a USB 3.0 Mass Storage Device.....22**

The MSD's Drives Device Descriptor .....	22-2
The String Descriptors .....	22-3
The BOS Descriptor .....	22-5
The Configuration Descriptor .....	22-8
Configure the MSD Drive .....	22-12
Other Comments .....	22-12

**Chapter 23. Using the UASP Mass Storage Device.....23**

Introduction to MSD Drives .....	23-1
The MSD Drive's Device Descriptors .....	23-2
The String Descriptors .....	23-3
The BOS Descriptor .....	23-5
The Configuration Descriptor .....	23-8
Alternate Interface Zero .....	23-10
Alternate Interface One .....	23-13
Configure the MSD Drive .....	23-18
UASP and Streams .....	23-19
Introduction to the USB Attached SCSI Protocol .....	23-21
Sending Commands Using the UAS Protocol .....	23-22
Other Comments .....	23-28

## Part 4

### Chapter 24. Using a USB Protocol Analyzer ..... 24

The Beagle from TotalPhase .....	24-1
Setting up the hardware .....	24-1
Receiving bus traffic .....	24-2
Reading and Understanding the Report .....	24-3

### Chapter 25. The Human Interface Device..... 25

A Brief Introduction to Human Interface Devices .....	25-1
The HID Report Descriptor .....	25-2
How to parse the HID Report descriptor .....	25-3
The Included HID Parser Code .....	25-5
Retrieving Items .....	25-9
Another Report Example .....	25-11
Other Comments .....	25-13

## Part 5

### Chapter 26. Using a USB Video Camera ..... 26

The Camera's Device Descriptors .....	26-1
Interface Association and Function Descriptors .....	26-6
The Video Control Interface .....	26-8
The Video Streaming Interface .....	26-13
The Color Matching Descriptor .....	26-19
Alternate Interface Descriptors .....	26-20
A Known Video Device .....	26-22
A Little More Information .....	26-23
Configure the Camera for Video .....	26-24
Other Commands and Comments .....	26-25

### Chapter 27. Setting Up the USB Video Camera ..... 27

Choosing/Setting the Camera's Resolution .....	27-1
Resolution Negotiation .....	27-3
Choosing the Alternate Interface .....	27-5
Receiving Payload Data .....	27-6
Payload Data Format .....	27-9
Stream Buffer .....	27-11
Wrap up .....	27-12

### Chapter 28. The UHCI and ISO Transfers..... 28

Wrap up .....	28-1
---------------	------

<b>Chapter 29. The OHCI and ISO Transfers.....</b>	<b>29</b>
The OHCI Stack .....	29-1
ISO Transfer Descriptors .....	29-1
Creating an ISO Transfer .....	29-5
Frame Execution .....	29-6
Wrap up .....	29-6
<b>Chapter 30. The EHCI and ISO Transfers .....</b>	<b>30</b>
The EHCI Stack .....	30-1
ISO Transfer Descriptors .....	30-1
Creating an ISO Transfer .....	30-4
Frame Execution .....	30-5
Wrap up .....	30-7
<b>Chapter 31. The xHCI and ISO Transfers .....</b>	<b>31</b>
The xHCI Stack .....	31-1
ISO Transfer Descriptors .....	31-1
Creating an ISO Transfer .....	31-4
Frame Execution .....	31-5
Wrap up .....	31-5
<b>Appendix A - Disc Contents .....</b>	<b>A</b>
Contents of the disc/disc layout .....	A-1
Finding the Specification Files .....	A-3
Finding an Emulator .....	A-5
<b>Appendix B - Included Utilities/Source Code .....</b>	<b>B</b>
Using a USB Thumb Drive to boot your image .....	B-1
Obtaining a C/C++ Compiler .....	B-2
Obtaining an Assembler .....	B-2
DetCntlr -- Detect Controllers .....	B-2
GDevDecs -- Get Device Descriptor .....	B-3
HIDParser -- Parse a given HID Report Descriptor .....	B-4
MputImage -- Write a disk image to a floppy disk .....	B-6
VideoCam -- (Almost) Retrieve video from a webcam .....	B-7
<b>Appendix C - Tables, Figures, and Outlines .....</b>	<b>C</b>
Tables .....	C-1
Figures .....	C-11
Listings .....	C-14
Outlines .....	C-15

<b>Appendix D - Notes for all Controller Types/Devices.....</b>	<b>D</b>
Port Connection Status Change .....	D-1
ISO Transfers .....	D-1
Controller Quirks .....	D-2
Mismatched EHCI Companion Controllers .....	D-6
Device Quirks .....	D-8
Freescape Controllers .....	D-8
Big-Endian vs Little-Endian .....	D-8
The BOS Descriptor .....	D-9
Device Address Number .....	D-9
String Descriptors with an Index of 0xEE .....	D-9
The Configuration Descriptor's Bus Powered Bit .....	D-10
The Toggle Bit .....	D-10
Intel Panther Point Controllers .....	D-12
Other .....	D-12
 <b>Appendix E - Request Sense Return Data .....</b>	 <b>E</b>
 <b>Appendix F - Brief History of USB .....</b>	 <b>F</b>
Specification/Hardware Release History .....	F-1
Brad Hosler - A Founder of USB .....	F-3
 <b>Appendix G - xHCI TRB Types and Completion Codes .....</b>	 <b>G</b>
Setup Packet .....	G-4
bmRequestType .....	G-4
bRequest .....	G-5
Descriptor Types .....	G-6
 <b>Appendix H - USB OTG (On The Go) .....</b>	 <b>H</b>
 <b>Appendix I - USB Class Codes .....</b>	 <b>I</b>
 <b>Appendix J - Device Firmware Upgrade .....</b>	 <b>J</b>
Upgrade Process .....	J-2
Wrap up and Comments .....	J-2
 <b>Appendix K - New Type C USB Connector .....</b>	 <b>K</b>
 <b>Appendix L - Bootable USB Devices .....</b>	 <b>L</b>
Bootable Code .....	L-1
Non-Standard Detection .....	L-3
Best First-Sector Format .....	L-5

Experienced Example .....	L-6
Wrap up .....	L-7

## **Appendix M - USB Legacy Keyboard Support ..... M**

UHCI's Register Interface .....	M-1
OHCI's Register Interface .....	M-4
EHCI and xHCI Legacy Support .....	M-7
Host Controller Extended Capabilities List.....	M-7
EHCI USB Legacy Support .....	M-9
A BIOS Quirk and the EHCI .....	M-11
xHCI USB Legacy Support.....	M-12
Wrap up .....	M-13

## **Appendix N - EHCI and Built-in Transaction Translators ..... N**

Register Additions .....	N-1
Functional Differences .....	N-3
Found Controllers.....	N-3
Wrap up .....	N-3

## **Appendix Q - Building a Simple USB Device ..... Q**

Our Attiny2313 Breakout Board .....	Q-3
Soldering the Components.....	Q-5
The Programmer .....	Q-6
The Cross Compiler .....	Q-6
Fusing and Flashing.....	Q-8
Build Blink Device .....	Q-10
Troubleshooting .....	Q-11
Building an Actual USB Device .....	Q-12
Build Output Device .....	Q-13
Build Input Device .....	Q-18
Conclusion.....	Q-22
Other Comments .....	Q-23

## **Appendix X - For More Information ..... X**

Where to get the CDROM that is included with this book .....	X-1
Where to find more information on this book .....	X-1
Where to get an erratum if one is needed.....	X-1
Where to get more examples .....	X-1

## **Bibliography ..... Bib**
